

Oklahoma Comprehensive Water Plan - Public Water Supply Planning Guide  
 Table 3-8: Water Quality Data

| System Name                   |                           |                  |    |      |      |      |
|-------------------------------|---------------------------|------------------|----|------|------|------|
| Parameter                     | Location                  | Period of Record |    | Avg. | Min. | Max. |
|                               |                           | From             | To |      |      |      |
| Temperature (°C)              | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Turbidity (NTU)               | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Alkalinity (mg/L as CaCO3)    | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| pH                            | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Hardness (mg/L as CaCO3)      | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Chlorides (mg/L)              | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Total Dissolved Solids (mg/L) | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Other:                        | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
| Other:                        | Raw Water Source 1        |                  |    |      |      |      |
| Notes                         | Raw Water Source 2        |                  |    |      |      |      |
|                               | Finished Water Location 1 |                  |    |      |      |      |
|                               | Finished Water Location 2 |                  |    |      |      |      |
