Column descriptions:

(B) Historical population available (C) Calculated percent change in historical population (D) Available population projections (e.g. from OCWP) (E) Calculated percent change in available population projection (column D) (F) Calculated population projection based on average historical percent change (column G). This method should be used when the OCWP projections are not acceptable and no other Population projections are available. (G) Assumed percent change used to calculate population projection (column F).
